

# Top 5 LMS Trends in 2021 that you Must Know

With a paradigm shift towards remote-first culture, organizations are adopting effective eLearning strategies to engage better and upskill their workforce. Today, businesses are investing in Learning Management Systems (LMSs) to deliver continuous, personalized, and more impactful training.

Here are the top **LMS trends for 2021** that can take your learning experience to the next level while unlocking performance and business success.

#1

## Shift from ILT to vILT

The shift from instructor-led training (ILT) to Virtual ILT approach encourages employee upskilling, better collaboration, and learning at the point of need

#2

## Experience-driven Learning

Experience-led learning caters to the diverse job roles, learning history, and KRAs, thus driving employee retention and performance impact

#3

## Learning Analytics

Analytics plays a crucial role in understanding learners' needs while tracking their performance to analyze learning behavior, engagement, and productivity levels

#4

## Video-based Learning

Short video chunks enable learners to engage, retain, and upskill by accessing courses across their personalized mobile devices- anytime, anywhere, and even on the go

#5

## Content Curation

Smart content curation helps learners to follow custom learning paths and access recommended courses that improve their skills and boost training efficiency
